M. Scott Myer Award for Applied Research in the Workplace TeamSTEPPS[™]: Team Strategies and Tools to Enhance Performance and Patient Safety

TeamSTEPPS[™] is a multiyear research and development project aimed at improving the quality of medical care and reducing medical error by leveraging lessons learned from research on teams, team performance, and the science of learning. The theoretical underpinnings, supporting research, courseware, and future directions of TeamSTEPPS[™] will be described.

Personnel Selection for High-Risk Occupations: Our Current State

Personnel selection is becoming increasingly important as today's world of work becomes more complex, dynamic, and dangerous. This panel discussion seeks the expert opinion of researchers regarding the current state of selection for high risk occupations and to identify novel approaches being developed and evaluated by I-O professionals.

Personality in the Workplace: Advances in Measurement and Assessment

New approaches to enhance the validity of personality assessments are explored. Issues on deciding appropriate predictor breadth, developing alternate approaches to assess faking, assessing the effects of faking on construct validity, the role of criterion matching, and mechanisms by which contextualizing assessments enhance validity are presented.
