

## Who We Are

The Methods of Synthesis and Integration Center (MOSAIC) is a collection of experts, evidence, and tools to improve research and practice in education, health, international development, social welfare, and workforce.

## What We Do

**Conduct high quality evidence synthesis research.** Our projects include systematic reviews, meta-analyses, methodological examinations, trainings, and knowledge translation.

**Create products for applied reviewers and meta-analysts.** We create interactive web tools to show how to synthesize research findings, to identify gaps in the literature, and to collect evidence synthesis information.

**Improve systematic review and meta-analysis research methods.** We conduct methodological reviews, simulation studies, and validity tests of various statistical and review software.

**Promote the use and uptake of systematic reviews and meta-analyses.** We disseminate research in peer-reviewed journals or academic conferences, translate findings into reader-friendly briefs, teach workshops, and develop instructional videos and guides.

## What We Have Done

**80+** 

**completed or ongoing** evidence synthesis projects

**60+** 

**resources**, including papers, reports, and presentations of completed projects

**40+** 

**affiliated experts** with experience conducting evidence synthesis projects

**50+** 

**AIR staff** with What Works Clearinghouse (WWC) certification

 **Large-scale meta-analyses** in math, science, arts education, and school safety.

 **Meta-analysis training** for hundreds of individuals across the nation.

 **Improvement of statistical methods and processes** for systematic reviews and meta-analyses.
