

Why Is Career and Technical Education (CTE) Important for Employment Success for Students With Disabilities?

College and Career Readiness Gaps Persist for Students With Disabilities

Persons with a disability are less likely to graduate on-time, attend college or be employed compared to those without a disability. The disparity in employment between those with or without a disability continues for those who attend college.

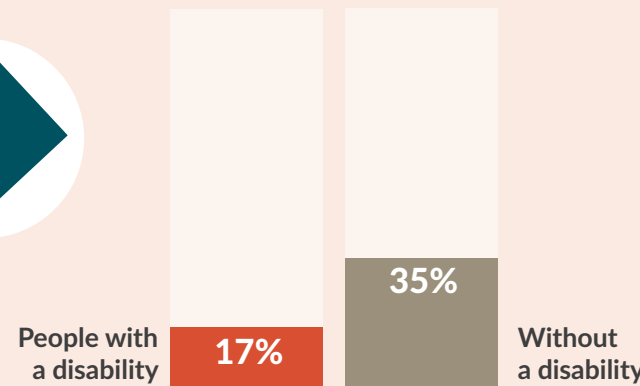

Lower on-time high school graduation rate

Lower employment rates: bachelor's degree

Employed people with a bachelor's degree or higher in 2016

CTE Participation Improves College and Career Readiness Outcomes

Students with a disability who are CTE concentrators* have better outcomes.

3% fewer unexcused absences

5% more likely to graduate high school on time

20% more likely to be employed after graduation

*CTE concentrator is a student who has taken at least four courses of CTE in high school.
